(54) Title: HEARING PROSTHESIS COMPRISING RECHARGEABLE BATTERY INFORMATION

(57) Abstract: A hearing prosthesis is disclosed with comprises memory means for storing charging control information associated with charging of a rechargeable battery cell that functions as a power source for the hearing prosthesis. Also, a rechargeable hearing aid system is disclosed which comprises a common communication interface adapted to transmit charging control information from the hearing prosthesis to the charger so as to allow the charger to adapt its charging parameters to a variety of different types of rechargeable batteries.
